We respectfully submit this quotation for the following NEW Toyota Diesel Powered Lift Truck (1 each):

Toyota...Proud to be the world's #1 forklift manufacturer!

TOYOTA MODEL 8FD70U, Diesel Lift Truck, quality engineered with the following specification:

- Pneumatic Tires
- Diesel Powered

SYSTEM OF ACTIVE STABILITYTM (SAS)

Toyota's industry exclusive System of Active Stability (SAS) helps reduce lift truck instability by electronically monitoring and controlling various functions of the lift truck.

• Active Mast Function Controller (AMC): Should the operator inadvertently place the lift truck in a potentially unstable longitudinal condition, these same sensors trigger the SAS controller to activate the AMC, which limits forward tilt and/or tilt back speed to help reduce the likelihood of a longitudinal tip over.

TOYOTA ENGINE

Engineered to the highest standards of quality, durability, and reliability, your Toyota lift truck is outfitted with the industry's most respected industrial engines.

Models 8FD70U Shown

Photo may portray optional equipment not included in your quotation.

2-SPEED AUTOMATIC (POWERSHIFT) TRANSMISSION

A standard 2-speed automatic transmission with 2 forward and 2 reverse gears provides superior torque, gradeability and acceleration to get the job done. Designed by Toyota engineers, this electronically controlled transmission passed 120 testing parameters to ensure it can meet the rigorous demands of your application. A standard 1st gear lock switch on the left-hand side of the steering column also allows the operator to lock the transmission in 1st gear when needed.

AUTOMATIC FORK LEVELING

Toyota's Automatic Fork Leveling feature increases productivity while reducing damage with a push of a button. By depressing the Automatic Fork Leveling button during forward tilt, operators are quickly and easily able to level the forks.

FULL FLOATING PLANETARY DRIVE AXLE

Your Toyota lift truck is outfitted with a rugged planetary drive axle. This planetary drive axle decreases the torsional stresses commonly experienced with power shifting, resulting in greater durability, reliability, which results in

increased uptime.

Mast

2-Stage (V) mast with limited free lift provides excellent visibility to load and fork tips, while providing smooth, quiet and consistent operation. Mast specifications:

Maximum Fork Height - 179.5"

Overall Lowered Height - 130.3" (Overhead Guard Height - 90.90")

Free Lift - 4.9" with standard Load Backrest

Lifting Capacity

Base Model Capacity - 15,500 lbs. @ 24" load center

Actual Capacity, based on quoted specifications, - 14,000 lbs. @24" load center to 179.5" MFH

Actual capacity ratings stated above are based on standard features, options, and attachments available through Toyota at the time of quoting. Non-standard features, options, and attachments may affect actual capacity ratings. Please contact your Toyota sales representative for additional information.

Tilt

6 degrees forward and 12 degrees backwards

PROPOSED BY

Quoted Model: GP155VX Available Features

Yale® VERACITOR® GP155VX pneumatic tire lift truck. Nominal 15,500 lb. capacity at a 24" load center. Veracitor trucks feature industrial-grade critical components that maximize productive value and economic life of the lift truck. Their rugged powertrains and cooling systems are designed specifically for tough applications. The isolated powertrain design reduces noise and vibration minimizing operator fatigue and increasing operator productivity throughout a shift. Highly reliable electrical systems provide sophisticated control of truck functionality leading to outstanding efficiency. The cowl-to-counterweight access and on-board diagnostics makes servicing fast, easy and convenient, making the Veracitor® VX series the standard in truck serviceability. Standard Equipment includes: Integrated Dashboard Display, Operator Restraint System, Operator Presence System (OPS), Low Fuel Indicator, Infinitely Adjustable Steering Column and Floor mat. The innovative Yale® Flex Performance Technology™ offers the flexibility to maximize fuel economy or productivity to match application needs. This feature provides operators the ability to achieve a balance of enhanced performance and superior fuel economy, or to maximize productivity during peak business periods when moving more loads is integral to the success of the operation.

Keep in mind all our lifts are reconditioned. All units go through a detailed 130 point check, anything that doesn't work or is broken gets fixed or replaced. Then if necessary the lift gets fresh paint from the bare metal all the way up, new decals and then before it ships out to you the lift get another inspection from our mechanics to ensure there are no issues when you receive it.
